

# EIKO FIRE RESISTANT DEPOSIT SAFES

Safes can be used like a conventional safe during working hours, and its specially designed night deposit drawer allows secure night deposits.

# EIKO FIRE RESISTANT DEPOSIT SAFES

These deposit safes are fire resistant,  
tested to the JIS Standards.

The master safe is with key and combination lock  
which can be locked at all times.

The drawer has a aperture which opens only  
when the drawer is shut allowing the money  
to fall into the master safe.

The drawer is also locking with a separate key  
from that which opens the master safe.
