

K'824 ...advanced ticket dispenser console

K'824 ticket console is a round shaped esthetic pedestal.

As a complementary article, the pretty shape of K'824 adds value to your architectural design,

Ticket dispenser is composed of a custom design "Thermal Label Printer" with a special control board printing "preformatted" queue tickets.

For cost-saving purposes, it can be used as a stand alone device, or it can be placed on top of simple pedestals.

K'824 combines in one unit:

A printing module inside,

Service select buttons on front panel,

A window for replacable service name sheet,

A lifting panel for easy paper roll change.

Optionally, the system power supply unit and master interface board can be placed inside.
